

SCHOOL INTEGRATED PROGRAMS

Academic Partnerships for Stronger School Outcomes & Competitive-Exam Readiness

Flexible • School-Compatible • Outcome-Focused • Student-Centric

Preksha Institute welcomes academic collaborations with schools that want to strengthen classroom learning, board performance, competitive-exam readiness and long-term career preparation through a structured integrated model.

Our approach is designed to complement the school timetable—not compete with it. Program structure, delivery mode, schedule, batch size, academic focus and duration are planned jointly with the partner school so that students receive additional academic depth with minimum disruption to regular school activities.

What the Partnership Can Cover

Engineering & Medical	JEE (Main & Advanced), NEET (UG), board-aligned PCM/PCB support
Defence & University Entrances	NDA, CUET and other relevant national-level entrance examinations
Foundation & Olympiads	National & International Olympiads, aptitude, reasoning, science and mathematics enrichment
Boards & Career Readiness	Concept strengthening, test practice, academic workshops, career awareness and performance improvement

Ideal for schools seeking:

- An integrated academic support model within the school ecosystem
- Specialized competitive-exam preparation without requiring students to manage separate coaching schedules
- Stronger assessment, practice and performance tracking systems
- Academic enrichment programs, workshops and targeted exam-readiness modules

Flexible Delivery Models

Every school has a different academic calendar, student profile and infrastructure. The collaboration can therefore be configured in one or more of the following formats.

Model	How It Works	Best Suited For
On-Campus Integrated	Preksha faculty conducts scheduled academic/coaching sessions at the school campus.	Schools seeking a fully integrated in-school academic enhancement model.
After-School / Extended Learning	Focused sessions are conducted before/after the regular timetable or in dedicated academic slots.	Schools that want additional preparation without altering core periods.
Institute-Supported Model	Students attend selected sessions, tests, workshops or doubt clinics at Preksha Institute.	Schools seeking access to specialized infrastructure or selective support.
Hybrid Academic Support	A planned combination of classroom teaching, testing, digital resources, mentoring and periodic workshops.	Schools that prefer flexible implementation across the academic year.

Core Academic Components

Expert Faculty Trained subject faculty aligned to the agreed program and student level.	Structured Teaching Concept-based, exam-oriented academic delivery supported by planned practice.
Assessments & Test Series Periodic tests, topic-wise practice, mock examinations and performance analysis.	Doubt Resolution Dedicated doubt-clearing and targeted academic support for learning gaps.
Performance Feedback Student progress insights and academic feedback shared with the school wherever appropriate.	Workshops & Mentoring Academic workshops, exam strategy sessions, career awareness and student motivation modules.

Designed Around the School

- Academic schedules are jointly planned to minimize disruption to school activities.
- Batch size, frequency, duration and program intensity are customized to the institution's requirements.
- The model can be implemented for selected classes, subjects, examination tracks or the wider school cohort.
- Infrastructure requirements are mutually agreed based on the selected delivery model.

Value for Students & Schools

For Students	For Partner Schools
• One coordinated academic ecosystem for school + entrance preparation • Stronger concepts, regular practice and structured revision • Reduced need to manage multiple disconnected schedules • Frequent testing and actionable feedback • Early exposure to competitive-exam patterns and strategies	• Expanded academic offerings without building every specialist function in-house • Access to competitive-exam faculty, test systems and academic planning support • Improved student engagement and performance monitoring • Flexible programs aligned with school priorities and calendar • A long-term academic partnership model that can scale over time

How a School Partnership Begins

1. Academic Consultation	Understand the school's goals, classes/streams, timetable, student needs and desired outcomes.
2. Program Mapping	Identify subjects, examination tracks, delivery mode, calendar, faculty deployment and assessment plan.
3. Customized Proposal	Share a school-specific academic and operational proposal, including mutually agreed commercial terms.
4. Formal Understanding	Finalize responsibilities, coordination, confidentiality, program duration and other terms through a written agreement/MOU.
5. Launch & Orientation	Conduct student/parent orientation where required and begin the academic plan according to the agreed schedule.
6. Review & Improvement	Track student progress, review outcomes with the school and refine delivery as needed.

Partnership Framework

Preksha Institute keeps school collaborations flexible and institution-specific. The final academic, operational and commercial structure is discussed directly with each partner school and documented through a mutually agreed proposal and/or MOU.

Participation

Student participation and program scope are finalized in consultation with the school and communicated transparently.

Commercial Terms

Fees, revenue-sharing, payment processes or other commercial terms are not standardized on this webpage; they are customized and mutually agreed for each partnership.

Academic Responsibility

Preksha Institute provides the agreed faculty, academic content, assessments and learning support. The school supports coordination, communication and agreed infrastructure where on-campus delivery is selected.

Student Data & Confidentiality

Student information, academic records and internal materials shared during the collaboration are handled responsibly and confidentially.

Program Review

Academic performance and implementation are reviewed periodically so that the partnership remains relevant, effective and student-focused.

PARTNER WITH PREKSHA INSTITUTE

Build a school-integrated academic program tailored to your students, timetable and institutional goals.

Connect with our Academic Partnerships Team to discuss a customized collaboration.

Website note: Specific program terms are subject to institutional discussion and mutual written agreement.
